**ENFLIGHT AND FLIGHTSIM.COM JOIN FORCES TO ENCOURAGE  
REALISTIC FLIGHT PLANNING AND TRAINING**

**Stow, MA (November 30, 2011)** – Enflight, a leading innovator of intelligent flight planning applications, and FlightSim.com, the web’s #1 support site for flight simulator enthusiasts, today announced a joint effort to encourage the use of Enflight’s Flight Planning application along with flight simulation software to provide the most realistic, safe and complete educational and training experience for pilots and hobbyists.

For pilots of all certifications and flight simulation hobbyists, the combination of flight planning and simulation software provides the complete experiential continuum of route planning, weather briefing, FAA filing and flight simulation with the comfort and convenience of operation using a computer. By reviewing a real-world weather forecast on Enflight and simulating a flight using the real-time weather mode offered in most flight simulation packages, pilots and hobbyists can practice safe flight planning and training.

Nels Anderson, FlightSim.com Founder and Publisher said, “We have long felt that our FlightSim.com audience could benefit from using and experiencing the realism of flight planning to further their flight simulation enjoyment and gain a richer sense of flying. Using Enflight’s powerful and easy-to use application with flight simulation is a natural combination that we think our audience will really appreciate.”

Enflight Flight Planning combines flight route and airport planning, and the industry’s best and easiest to interpret weather briefing along with simplified FAA flight plan filing. Industry-leading weather briefing and dynamic airport information are integrated with unique Personal Minimums Analysis and intelligently presented at-a-glance graphics that reduce information overload and foster better decision-making.

For pilots the opportunity to simulate a realistic scenario from the start of planning a route through flight simulation enables them to maintain and improve their flight readiness. For simulation hobbyists, the addition of Enflight’s fully functional flight planning software adds full realism to their enjoyment while offering an educational gateway to becoming a certified pilot.

FlightSim.com is the leading online community for flight simulation and related product reviews, news, resources and education. Enflight Flight Planning is available as a web-based application with full iPad support and registration via a guest account, free trial, or an annual \$99 subscription through Enflight and FlightSim.com's Pilot Shop. Pilots of all types may learn more about and purchase flight simulation and Enflight Flight Planning at [www.flightsim.com](http://www.flightsim.com) and [www.enflight.com](http://www.enflight.com).

### **About Enflight**

Enflight offers pilots an exclusive suite of flight plan workflow products and tools that enable pilots to plan flights faster, more easily, and more safely. The software offers industry-leading web-based and iPad® accessible applications that provide flight planning and FAA legal briefings featuring sophisticated Personal Minimums Analysis and patented at-a-glance TAFSpiral™ weather infographics. As the original authors of the DUATS (CSC) briefing service, Enflight has the most established and tested code base in the business and wrote the original AOPA flight planning system. ### **About FlightSim.com**

FlightSim.Com is a central meeting place for everyone involved in flight simulation and provides extensive resources to use and enhance the simulated flying experience. Flight simulation is complex to use and FlightSim.com enables users to enjoy their simulations more by sharing their experiences and as a source of help when questions arise. FlightSim.Com has operated online since 1996 and its founders have been passionately using and reviewing flight simulation from the dawn of the industry in the mid 1980's. For more information, please visit [www.flightsim.com](http://www.flightsim.com)
